

Product Information Analysis

Objective:

This project is created for analysing product related information in a structured format. The goal is to build foundational skills in data exploration, logical functions, conditional aggregation, and text manipulation using Excel.

Dataset Description:

The dataset contains the following columns.

Column description:

Column Name	Description
Product ID	Number of the Product
Product Name	Name of the Product
Brand Name	Brand Name of the Product
Price	Price of the Product
Quantity	Quantity of the Product
Category	Product's Category
Price Range	Newly Added Price Range of the Product
Day	Newly Extracted Day for the Product
Country Code	Newly Extracted Country Code for the Product
Month	Newly Extracted Month for the Product

Formulas Used:

Sum, Count, and Average

A. Total price of all products

Formula: =SUM(D2:D35)

Result: \$10,100.00

B. How many products exist in the dataset

Formula: =COUNTA(B2:B35)

Result: 34

C. Average price of the products

Formula: =AVERAGE(D2:D35)

Result: \$297.06

Minimum and Maximum Values

A. Minimum price among all products

Formula: =MIN(D2:D35)

Result: \$30.00

B. Maximum price among all products

Formula: =MAX(D2:D35)

Result: \$1,000.00

IF Function

A. IF function to categorize products based on their price

Formula: =IF(D2>=500,"High Price","Standard Price")

SUMIF and COUNTIF

A. Total price of products in the Electronics category

Formula: **=SUMIF(F2:F35,"Electronics",D2:D35)**

Result: \$8,050.00

B. Number of products with a price less than \$100

Formula: **=COUNTIF(D2:D35,"<100")**

Result: 11

LEFT, RIGHT, MID

A. Extract Day from Product ID

Formula: **=LEFT(A2:A35,2)**

B. Extract Country Code from Product ID

Formula: **=RIGHT(A2:A35,2)**

C. Extract Month from Product ID

Formula: **=MID(A2:A35,4,3)**

Conclusion:

This project helps in understanding basic excel formulas and functions to provide better visibility into product performance. It enhances data analysis through excel-based analytical tools and visualization techniques.

	A	B	C	D	E	F	G	H	I	J
1	Product ID	Product Name	Brand Name	Price (\$)	Quantity	Category	Price Range	Day	Country Code	Month
2	28-JAN-US	Laptop	Dell	1000	30	Electronics	High Price	28	US	JAN
3	15-FEB-US	Sneakers	Nike	80	15	Fashion	Standard Price	15	US	FEB
